Connects your strategy to your delivery

The right project portfolio is more than just a list of your 'best' projects, it's the collection of projects that works together to best achieve your goals!

Creates higher value portfolios

Designed with end-users in mind, Bubble PPM™ is as strong at top-down management as bottom-up delivery.

- Provides all users with a single source of truth
- Ensures fact based decision making
- Enhances your returns on investments
- Creates transparency
- Improves quality, process, and metrics
- Drives cohesion and common purpose

Makes your role easier

Bubble® PPM™ makes it easy to access and distribute critical information (in the format that suits you best). It helps connect strategies to dependencies, strengthen project governance, and reduce the burden of project/portfolio administration.

Configuration and integration

Bubble® PPM™ can be closely tailored to your exact needs.

With a finely grained permissions model, our robust platform connects your people and projects to the process, with ease.

25% CONFIGURATION | 5% CUSTOMIZATION | 70% UNIVERSAL CORE

Flexible and quick to deploy

Our enterprise deployment model comprises a highly versatile core which can be enhanced with custom configurations. Bubble® PPM™ also supports multiple project and permissions types.

High Level Capability	Administrator	Portfolio Manager	Project Manager	Team Member	Read Only User
Manage users and permissions	●				
Update processes	●				
Add portfolios and create portfolio reports	●	●			
Prioritise projects	●	●			
Create and manage projects	●		●		
Add / remove project resources	●	●	●		
Generate project reports	●		●		
Manage and track project activities	●		●	●	
Remote collaborative access	●	●	●	●	●
View project and portfolio status reports	●	●	●	●	●

Fig. 12. Note: This table is not a functionality list. It simply illustrates the major distinctions between the roles. PPM™ provides finely grained permissions profiling, controlled by the Administrators, to ensure all users have access to the precise data they need and the capability to edit it appropriately. While there are practical minimum user considerations, there is no upper limit to the number of a particular user type.
