What Can be Done to Improve Resource Management?

In the Complex World of Food & Beverage Innovation…

Peter Hoyland

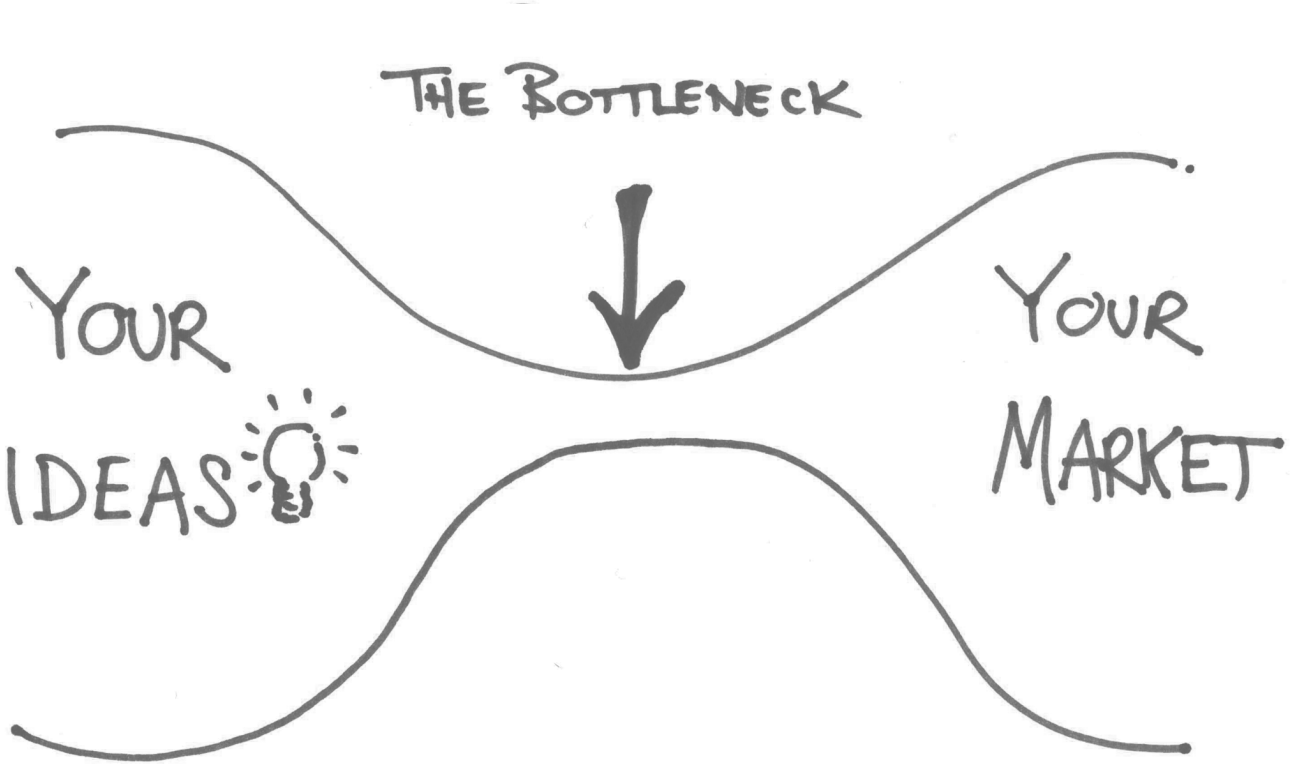

Director / Co-Founder | Bubble Group

Nov 2016

Introduction

Bubble

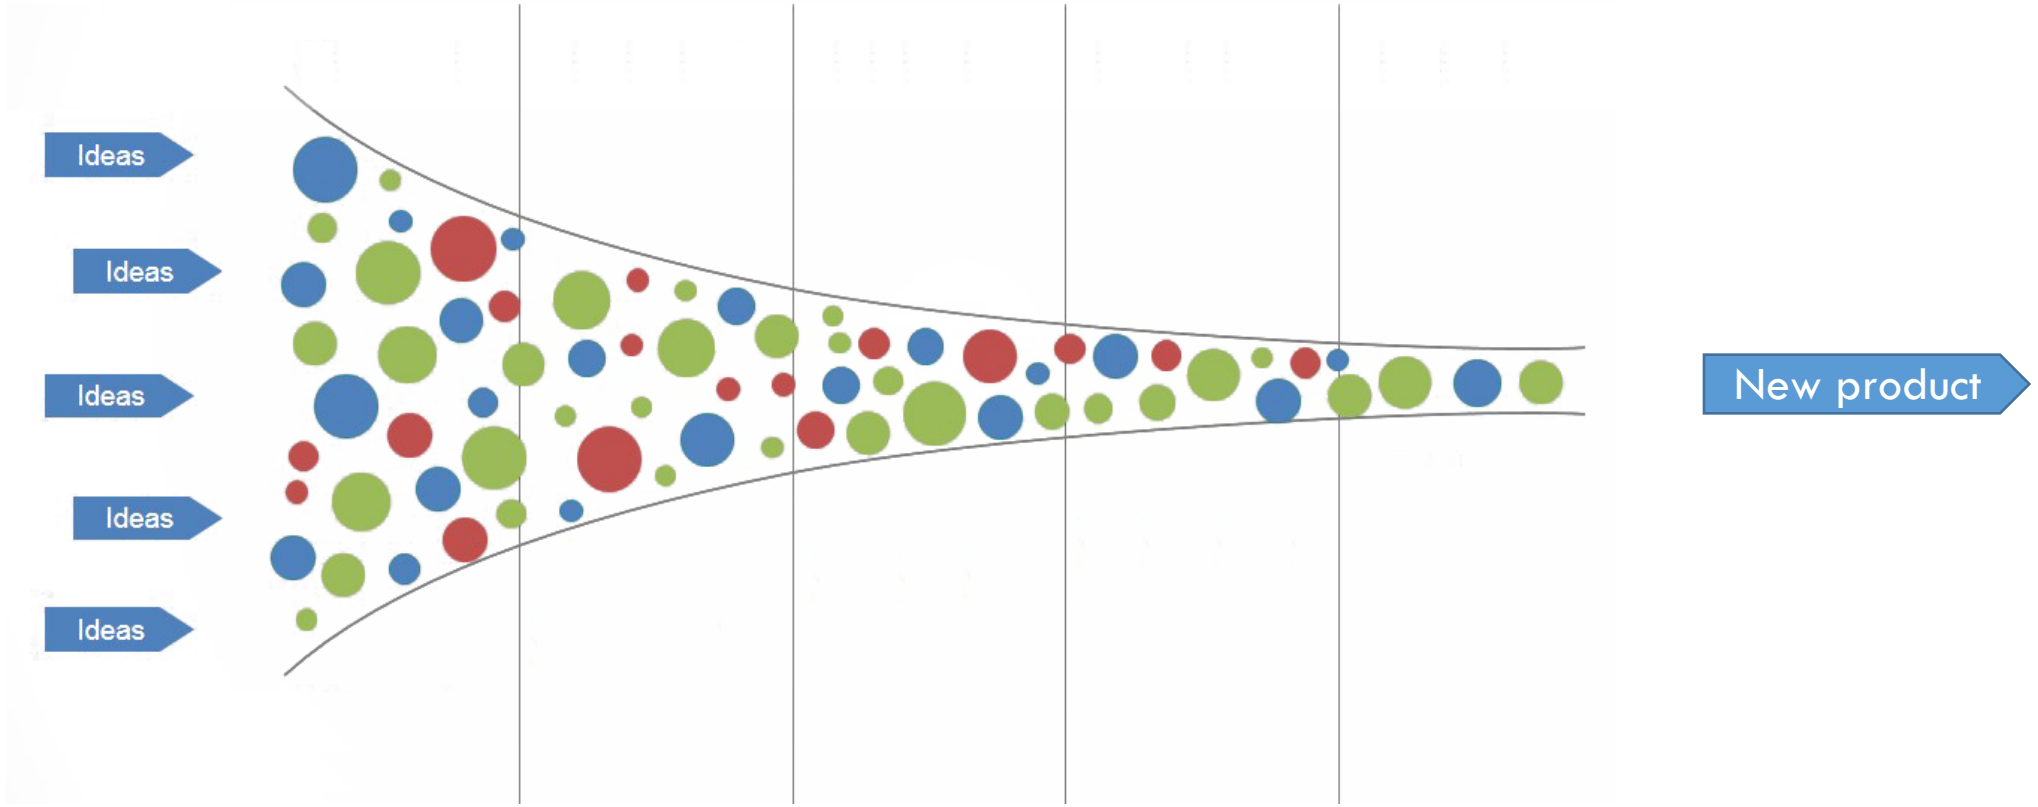

Bottlenecks

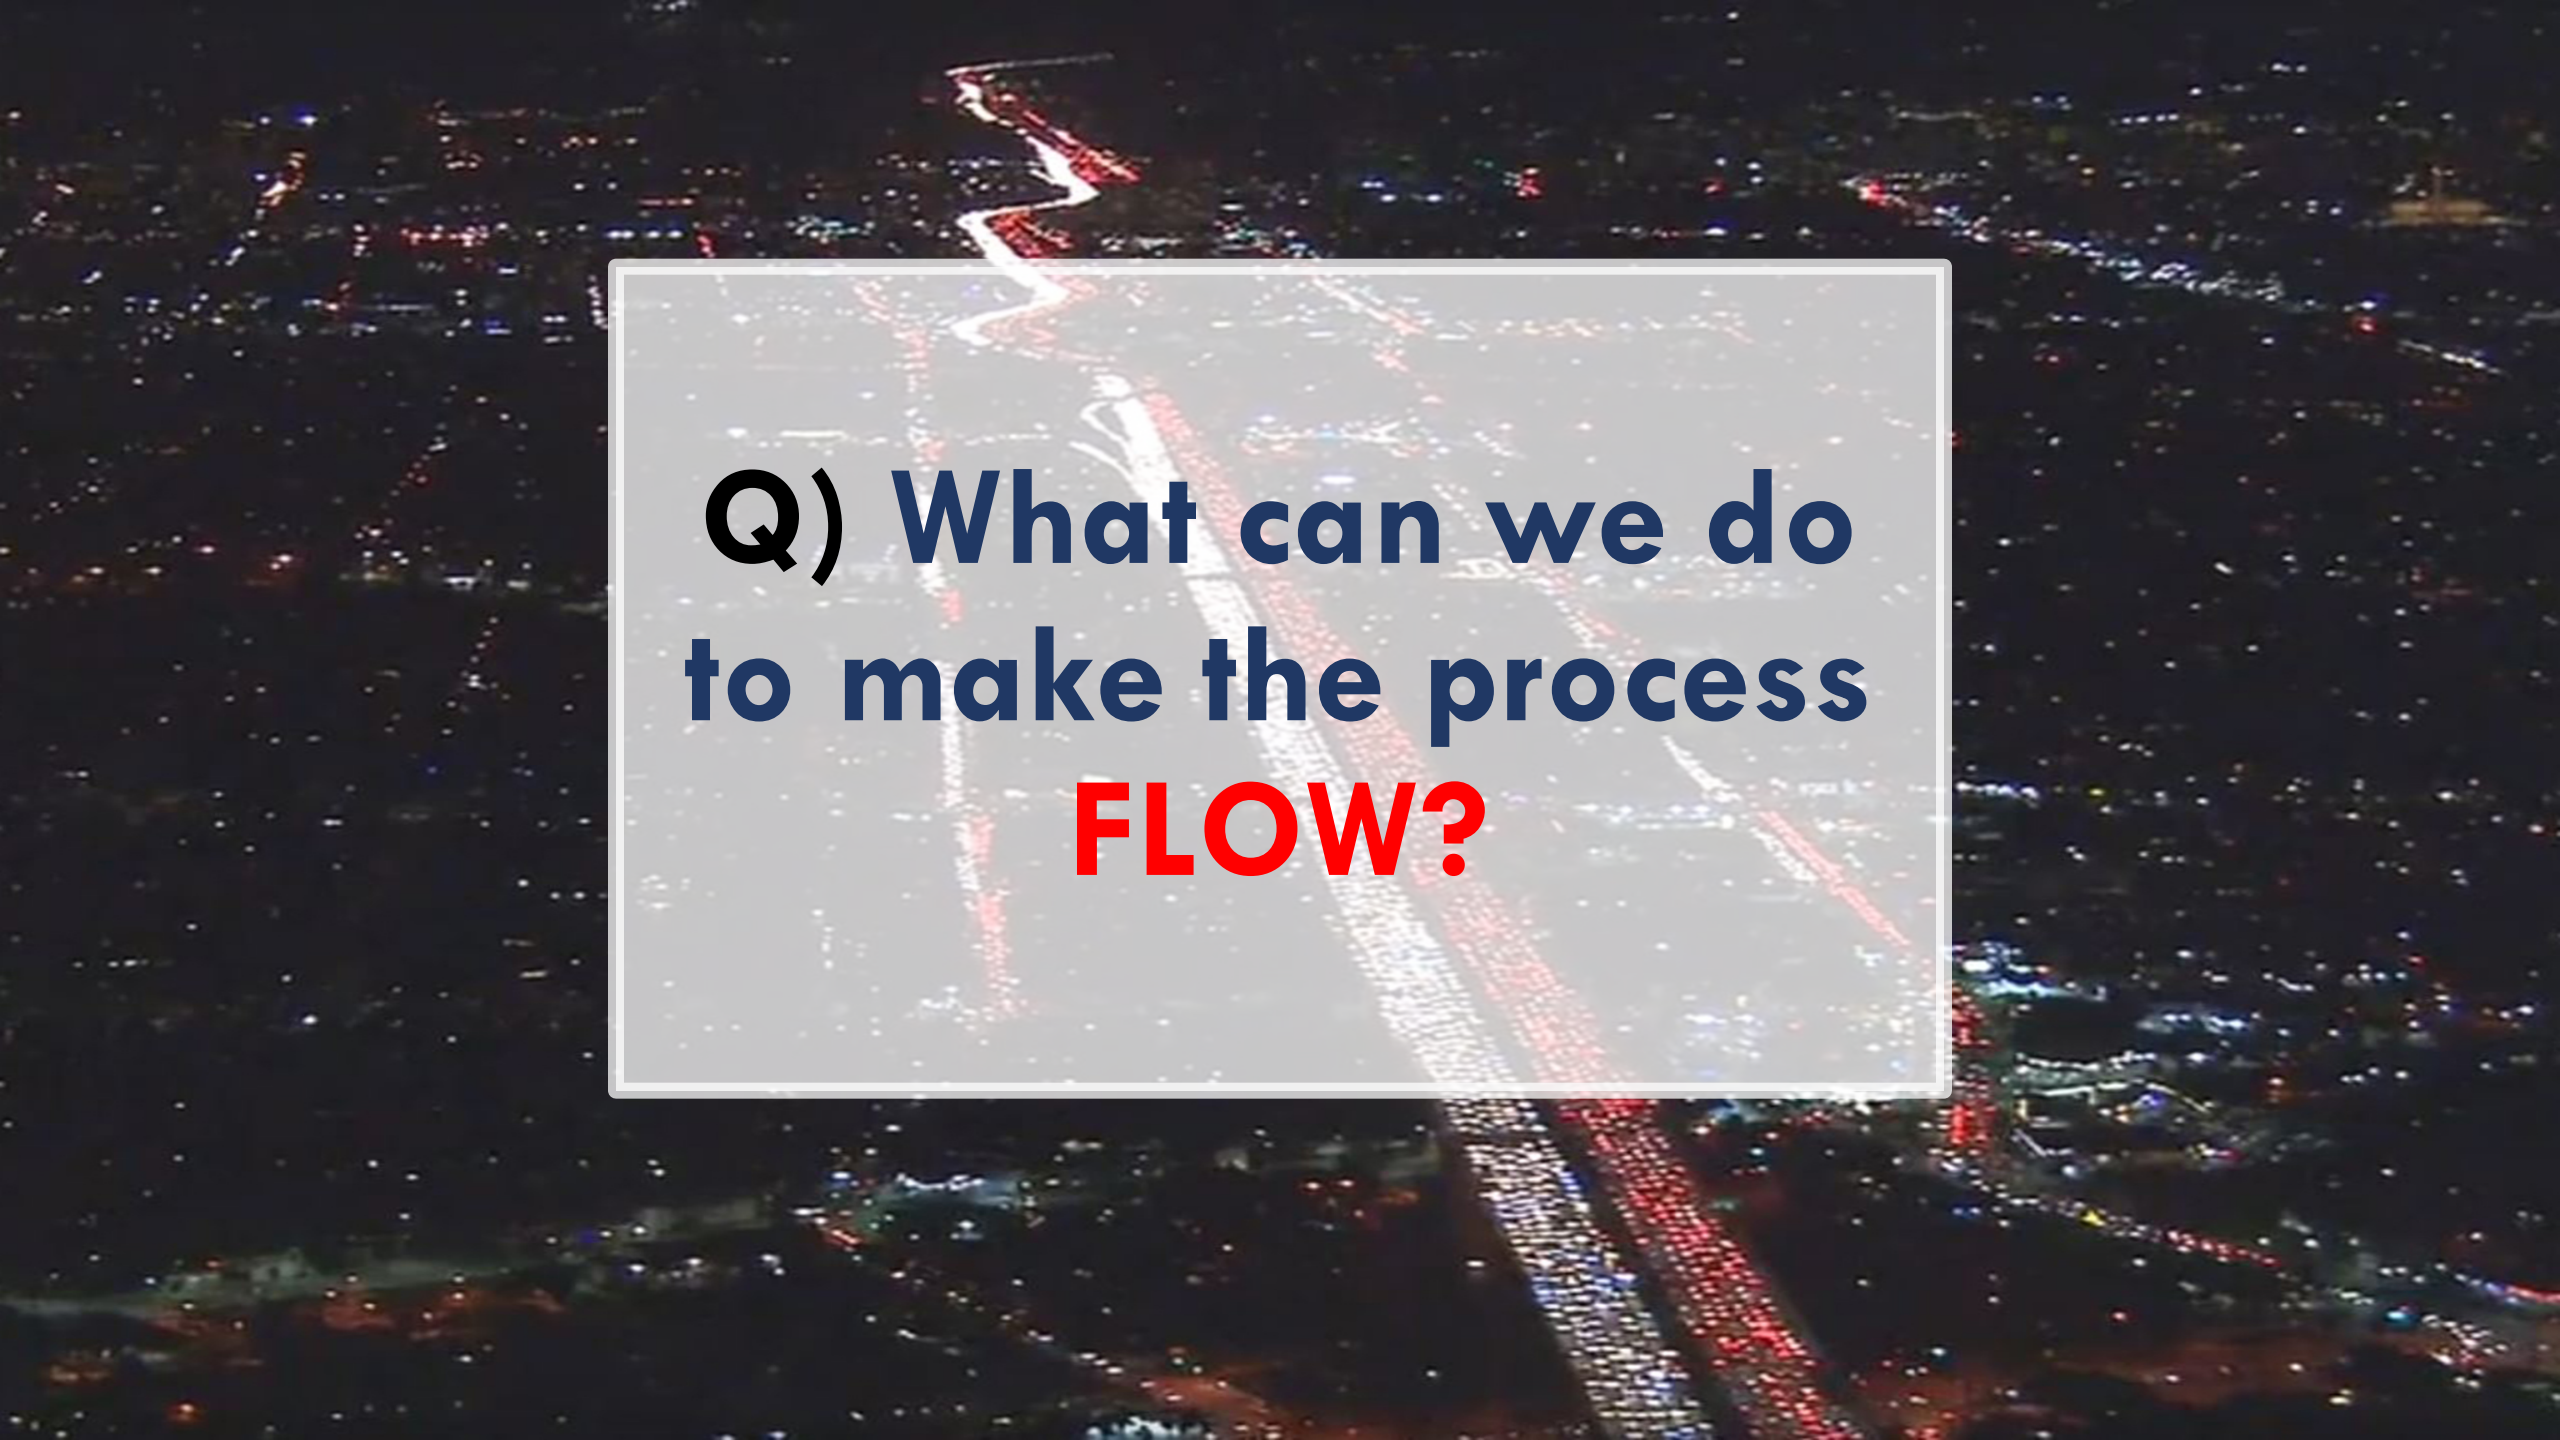

We even draw the process as a bottleneck!

Bubble

The paradox of 'managing' Innovation!

…BOTTLENECKS
LEAD TO JAMS

Q) What can we do to make the process FLOW?

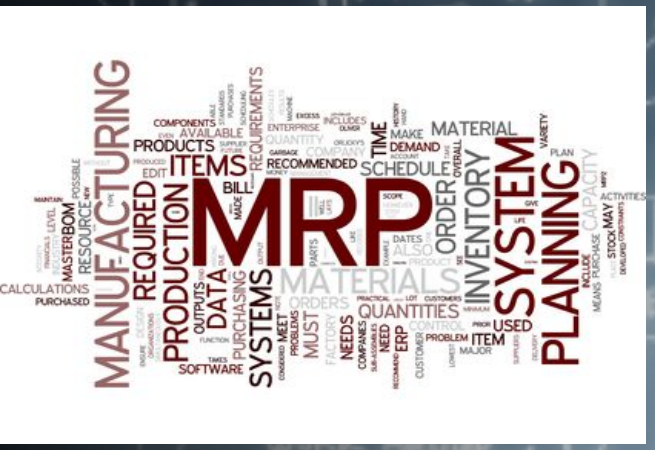

The planning problem

We need MORE planning / project management

We've had this problem before

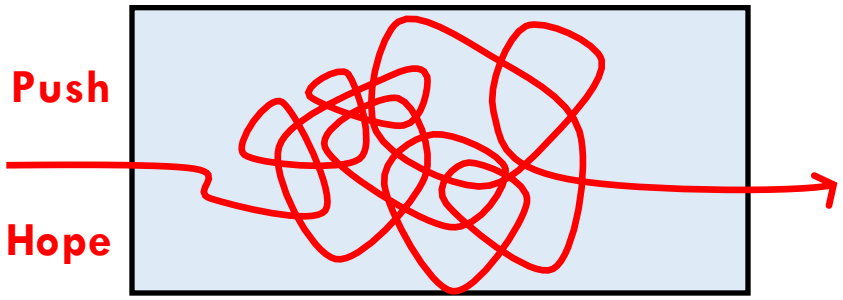

But there is a better way!

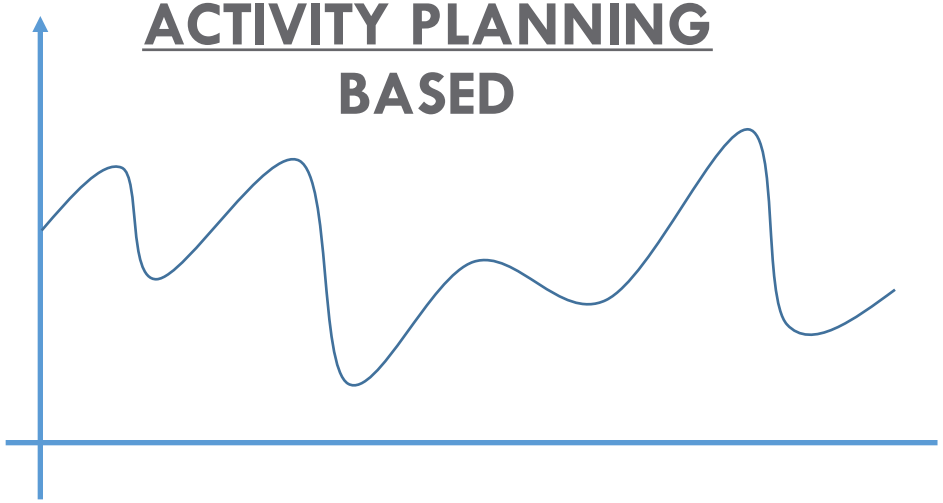

Push vs Pull

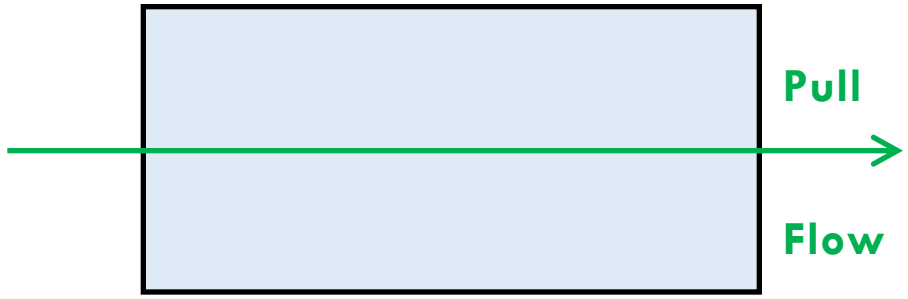

Bubble

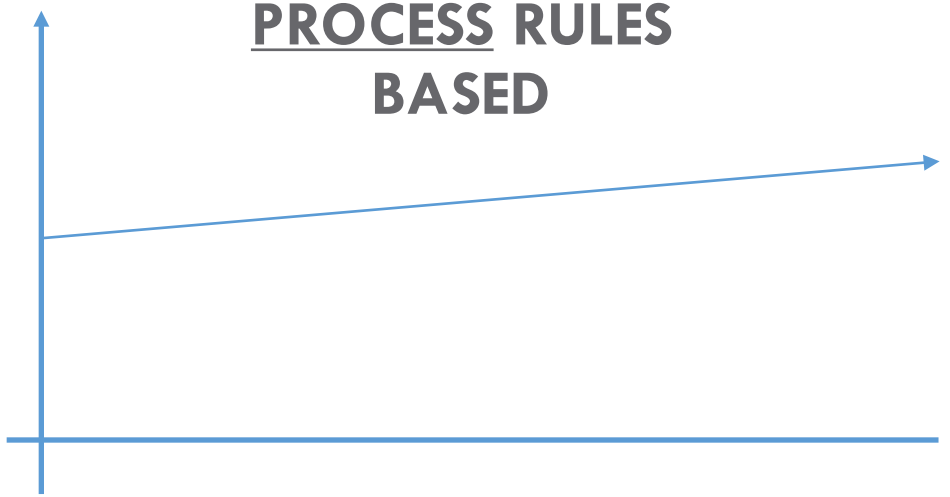

Requires intensive planning

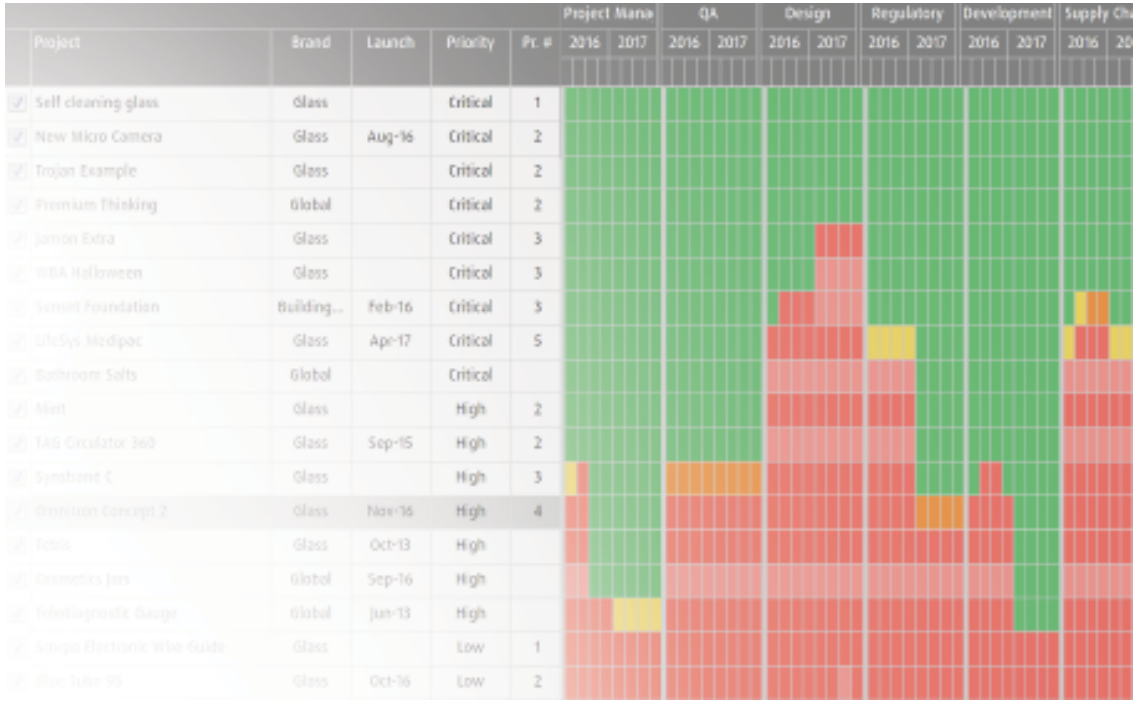

Requires minimal planning

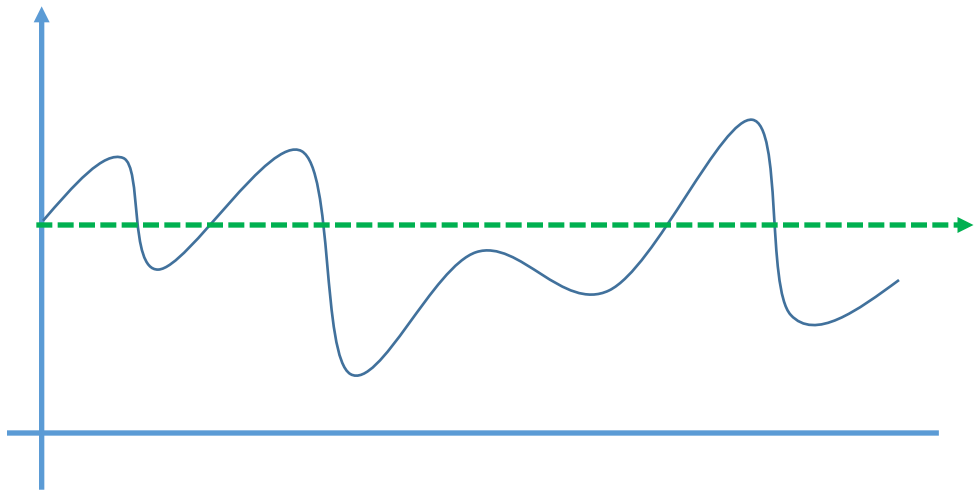

Activity Planning vs Capacity Planning

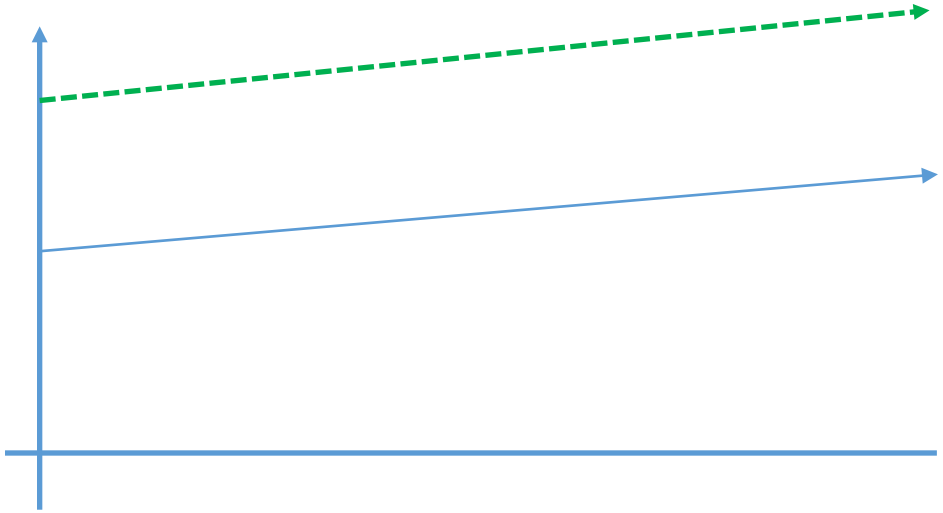

Moving the bar

Job 1

Level the Capacity (remove bottlenecks)

Job 2

Raise the Bar

Summary

Resource planning is a forward looking activity!

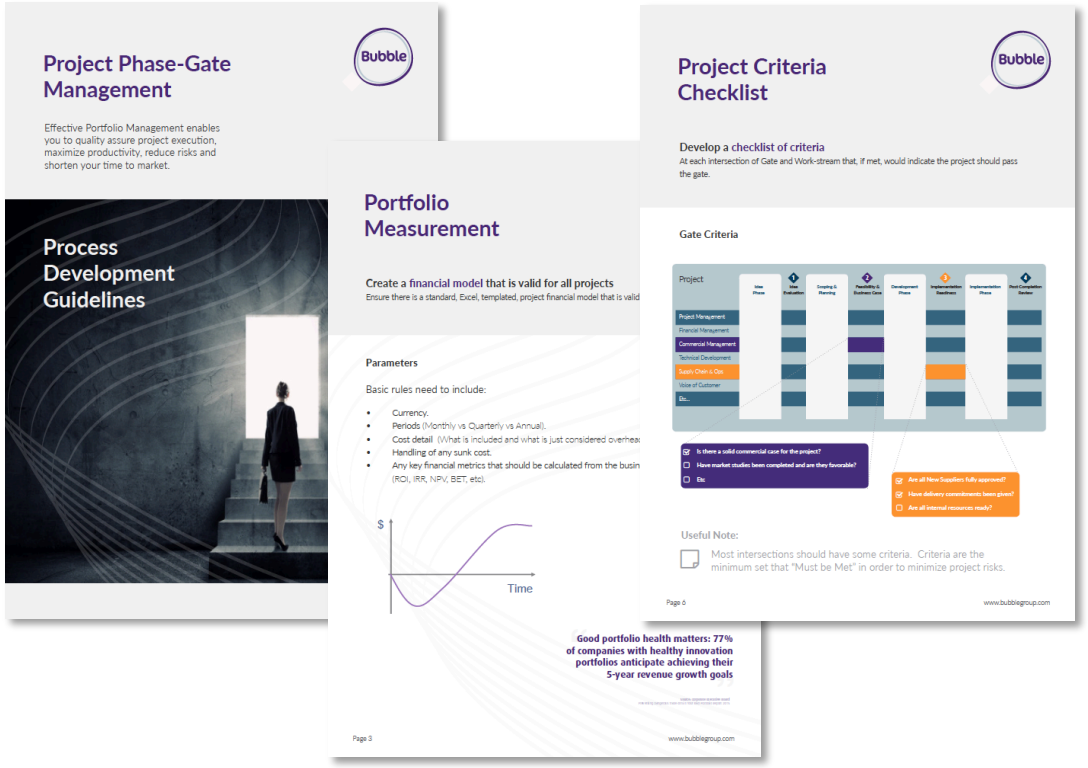

- **Extreme** Project Management is not an effective substitute for a good process
- Don't increase planning… **reduce the need** for it
- Use pull and RCCP to have a system that flows. Minimum WIP but **more output**
