Connects your strategy to your delivery

The right project portfolio is more than just a list of your 'best' projects, it's the collection of projects that works together to best achieve your goals!

Creates higher value portfolios

Designed with end-users in mind, Innovator™ is as strong at top-down management as it is at bottom-up delivery.

- Provides all users with a single source of truth
- Ensures fact based decision making
- Enhances your returns on investments
- Creates transparency
- Improves quality, process, and metrics
- Drives cohesion and common purpose

Makes your role easier

Innovator™ makes it easy to access and distribute critical information in the format that suits you best. It helps you to connect strategies to dependencies, strengthen project governance, and reduce the burden of project / portfolio administration.

Figure 1: Innovator™ eliminates the need for bespoke presentations with powerful visualization and reporting tools. 1-Click reports, with user appropriate content, can be created in seconds.

Sample screenshots

Created from the ground up and shaped by industry, Innovator™ is built on proven best practices.

Automatically collate, synchronize, and output complex data in informative ways.

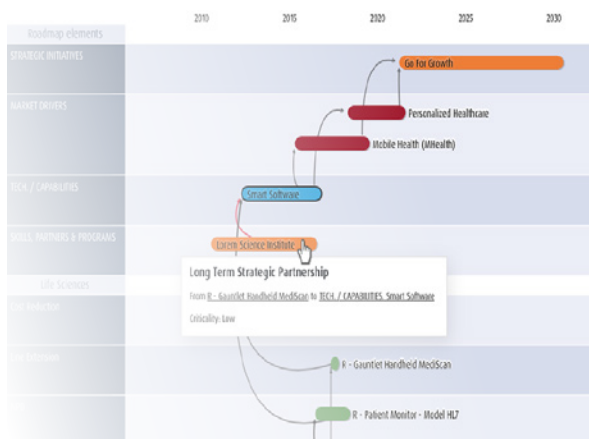

Fig. 2: Easily create roadmaps to communicate your vision

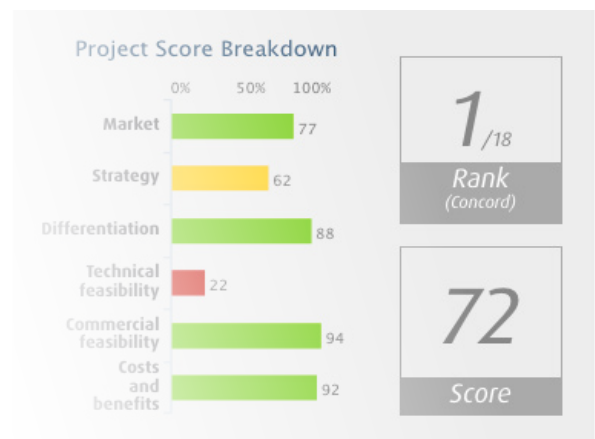

Fig. 3: Evaluate, compare and rank early stage projects on equal terms, even before you have any hard numbers in place

Fig. 4: Control project & process management

Fig. 5: Shape your portfolio to balance risks, optimize launch timings, and ensure all parts of your business are being sufficiently supported by your development teams.

Fig. 6: Optimize your portfolio with scenario planning and view all the critical data about your project using comprehensive portfolio dashboards.

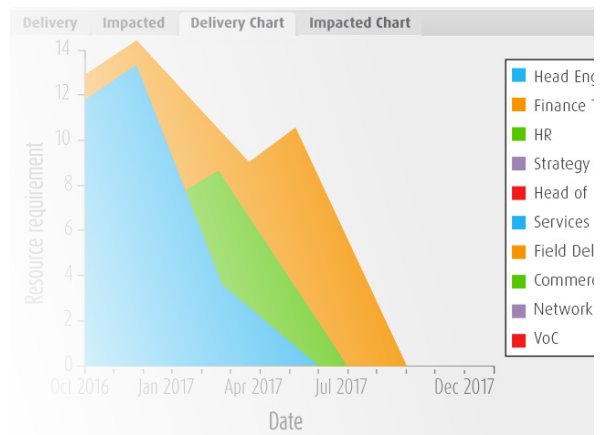

Fig. 7: Maintain control through real-time metrics.

Fig. 8: Build in as many check-points as you need for different project types and define gates with pre-set criteria according to function or work-stream.

Fig. 9: View all the critical data about your project using configurable project dashboards.

Fig. 10: Avoid bottlenecks by balancing workload.

Fig. 11: Send Project-on-a-Pagesm summaries, either for an individual project or for a portfolio. Use these to rapidly review status during monthly updates.

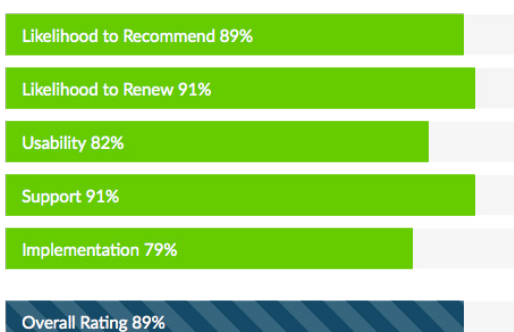

Why choose our PPM software?

Innovator™ provides unprecedented portfolio and project control. With users reporting shortened project lead-times of up to 75%, reductions in time-to-market by 50%, and 20-30% productivity gains.

The next logical step in process maturity

With all the benefits you'd expect from leading PPM software, Innovator™ is loved by users because it's:

- Intuitive & easy to use
- Highly configurable
- Supportive of your existing process
- Easy to view & report upon almost any variable
- Quick to implement (or scale)
- Designed with end-users in mind
- Non burdensome

“We were able to configure the system to how we wanted it, plus have great support all the way through the process.”

Configuration and integration

Innovator™ can be closely tailored to your exact needs.

With a finely grained permissions model, our robust platform connects your people and projects to the process, with ease.

Flexible and quick to deploy

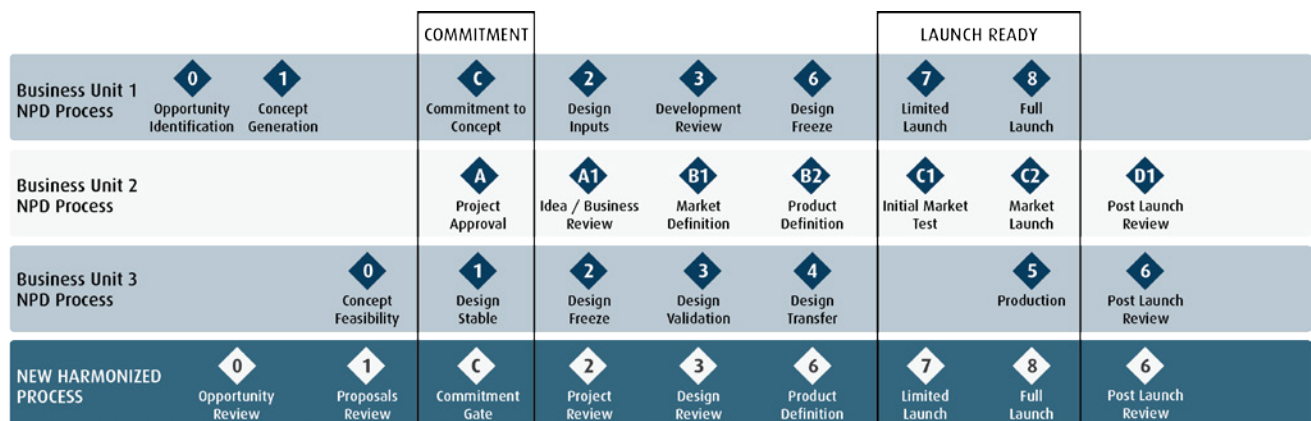

Our enterprise deployment model comprises a highly versatile core which can be enhanced with custom configurations. Innovator™ supports multiple project types and has 5 (or more) levels of user based permissions.

| High Level Capability | Administrator | Portfolio Manager | Project Manager | Team Member | Read Only User |
|---|---------------|-------------------|-----------------|-------------|----------------|
| Manage users and permissions | ● | | | | |
| Update processes | ● | | | | |
| Add portfolios and create portfolio reports | ● | ● | | | |
| Prioritise projects | ● | ● | | | |
| Create and manage projects | ● | | ● | | |
| Add / remove project resources | ● | ● | ● | | |
| Generate project reports | ● | | ● | ● | |
| Manage and track project activities | ● | | ● | ● | |
| Remote collaborative access | ● | ● | ● | ● | ● |
| View project and portfolio status reports | ● | ● | ● | ● | ● |

Fig. 13. Note: This table is not a functionality list. It simply illustrates the major distinctions between the roles. Innovator™ provides finely grained permissions profiling, controlled by the Administrators, to ensure all users have access to the precise data they need and the capability to edit it appropriately. While there are practical minimum user considerations, there is no upper limit to the number of a particular user type.

Process development consulting

For over 15 years, Bubble has been helping companies capture more value from their project portfolios. We recognize that making the jump from spreadsheets to software can be a significant undertaking for some companies and offer process support services* for those seeking to improve their capabilities or align activities. If you'd like to know more, please read the dedicated Process Consulting page on our [website](#).

Training and support

First phase deployment focuses on quick and efficient implementation of a working system within the company. Future refinements can be made by administrator users and our technical team is always on hand to help where needed. Implementation includes:

- Configuration
- Setting up of Production and Test instances
- Customer data uploading
- System validation
- Basic user training
- Support for initial population of system data

Infrastructure and policies

Robust and fully cloud-based, Innovator™ has all the safety, support and security considerations you'd expect of an enterprise collaboration platform. Our IT security policies include:

- Security of data
- Availability of service
- Confidentiality
- System processing integrity
- Access and privacy

Note: Process Development Consulting & bespoke Innovator™ customizations are not included as standard.

Bubble

Project Portfolio Management

Software | Process Improvement | Consulting

Bubble helps organizations to select the right projects, execute them reliably, and continuously increase their productivity.
