Full-Stack web application developer

Bubble are looking for a talented full-stack web application developer who can demonstrate experience of working with high performance and scalable enterprise web applications.

This is a great opportunity for the right person and you'll be joining the business at an exciting time, as we deliver the next generation of our world-class enterprise software.

If you're keen to hone your skills and join a growing company with a culture that's dynamic, forward-looking, and technologically advanced, then please get in touch. Working in our central London or Cambridge offices (or a mix of the two), we're able to offer the successful candidate:

- The security of an established company (that has the mindset of a start-up)
- A true voice at the table
- The opportunity to deploy and develop a wide range of skills

For role related questions, and to apply, contact: **recruitment@bubblegroup.com**

Technical experience

We are looking for somebody who understands the principles of great design and quality software development to create secure, efficient and reusable solutions. You need to enjoy the dynamics of an agile environment, and not be fazed by occasional deadlines. Our ideal candidate will have significant experience of Python and Django:

Primary skills
- Python
- Django (ideally Django REST framework)

Other relevant experience
- HTML5 / CSS / SASS
- API architecture
- Postgres
- Docker
- Kubernetes
- RESTful API consumption
- Unit and E2E Testing (test environments)
- UI/UX design
- AngularJS
- Native Javascript
- Build tools (Gulp, Webpack)
- Experience of working with code repositories (e.g. GIT) and bug tracking tools (e.g. Jira)

Interested?
