About

Our dedicated in- house technical support team make sure that all customers receive a prompt resolution to their software-related questions. This includes on-line, off-line, and in-person, support.

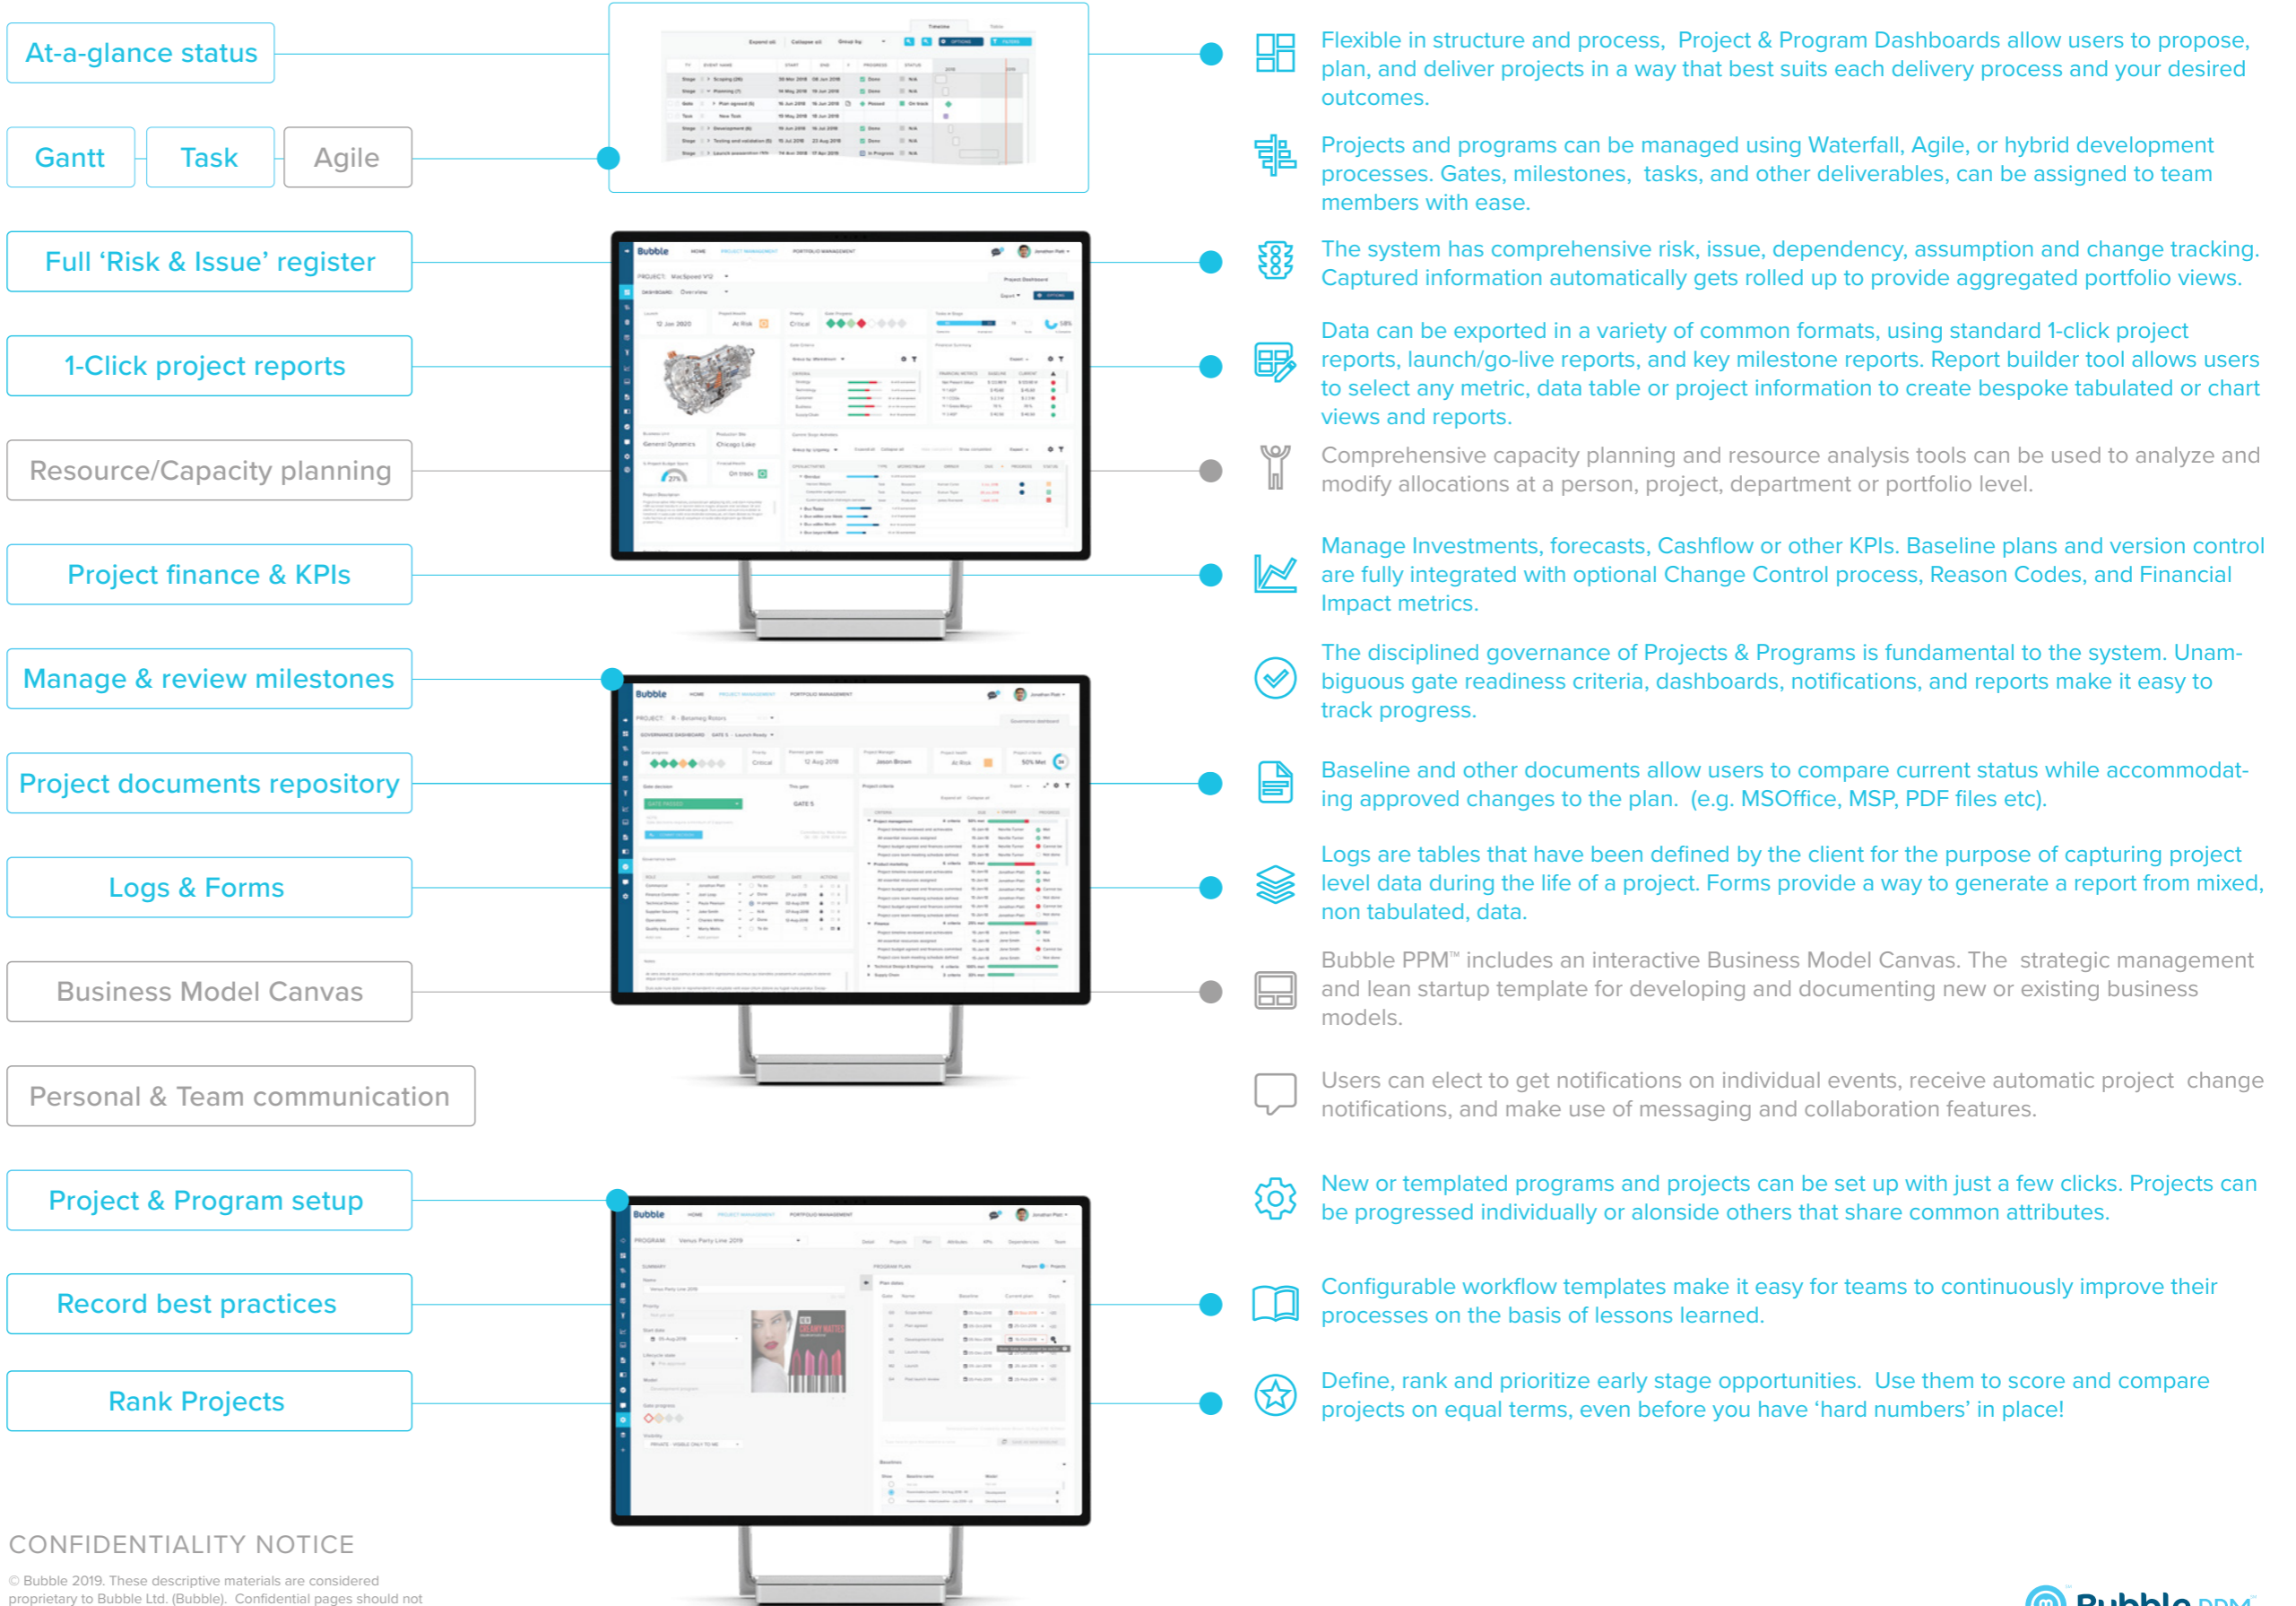

-  Task and Project lists can be defined by department, process, owner, workstream, due date etc. Each user's homepage illustrates their personal projects, tasks, and notifications.
-  The software's inbuilt communications module feeds into each user's homepage via the Message Center. Formal or informal messages can be sorted based on time, project, program tags or person.
-  Task lists can be defined by department, process, owner, due date etc. Personal task notifications can be viewed, reported or sent to individuals/groups/stakeholders by email.
-  Users can record hours against projects they are assigned to, assign and track staff cost codes, actual Vs. planned resource usage, time sheets and aggregate data across projects / teams and departments (to improve resource estimation models).
-  We provide outstanding technical and user support that consistently exceeds customers expectations. This includes direct support, resolution of technical issues, new feature requests and custom development requests.
-  Allows users to personalise their profile as well as set skills tags that others can use to identify and select team members for future projects and programs.
-  Bubble PPM™ leverages a very granular permissions layer that can be used to control exactly what each user (or user type) is able to see, and do. Client administrators have full control over application configuration to be able to make necessary changes without having to go through Bubble Support.
-  The formal home for application credits, company accreditations and policies, privacy notices and points of contact.

- PRIORITIZATION
- ROADMAPS
- LESSONS LEARNED

- The list view provides visibility of all projects in the portfolio and displays an at a glance view of current status and key financials. The data captured and displayed is entirely configurable.
- Configurable portfolio dashboards provide a rolled-up view of the full portfolio or any subset therein. Showing aggregated metrics based on projected benefits, costs, risks, or other KPIs.
- Standard and Personally created Dashboards, can be exported in a variety of common formats, using standard 1-click portfolio reports feature. Exports are configurable and provide options for numeric, text commentary, status summaries, and traffic light indicators, as examples.
- Comprehensive capacity planning and resource analysis tools can be used to analyze and modify allocations at a person, project, department or portfolio level.
- Manage Investments, forecasts, Cashflow or other KPIs. Baseline plans and version control are fully integrated with optional Change Control process, Reason Codes, and Financial Impact metrics.
- Prioritization module allows senior management to score, evaluate, rank, and prioritize existing, and early stage projects on equal terms (even when some may have no hard numbers in place).
- Create interactive product, service or technology Roadmaps to track Project and Program interdependencies in one holistic view encompassing strategy, delivery and enabling mechanisms.
- Configurable workflow templates make it easy for management to continuously improve their processes on the basis of lessons learned.
