Bubble® PPM

Our software and a service approach

Bubble PPM

PROJECT AND PORTFOLIO MANAGEMENT SOFTWARE

Bubble PPM software helps marry strategic objectives with efficient delivery

Successful project delivery and portfolio management typically starts with a leadership mandate to deliver broad outcomes or improvements within a certain time horizon. Bubble has been providing the tools, support and expertise to help companies achieve these goals for over two decades.

Whether you're targeting incremental or transformational change, our fully-supported, configurable PPM platform is a key enabler.

Key benefits

Designed by Subject Matter Experts, with best practice tools available out-of-the-box to help you meet your organizational goals

Fully managed deployments deliver early value and tailor the system to your processes, governance structure, metrics, reporting requirements, and more

Class-leading customer support to meet your evolving needs and to refine the system as required over the duration of the contract

Portfolio outcomes are better with Bubble

Our configurable system is tailored to reflect your unique requirements

Project and Portfolio Management software connects project delivery to higher levels of organizational strategy.

Our configurable, modular platform, combines core functionality with tools based on cross-sector best practices that can be tailored to the unique needs of your organization.

As process and system experts, we do the heavy lifting upfront, by efficiently translating requirements into working tools and system functionality. As the needs of your organization evolve, the configuration can also be easily refined. A standard deployment includes:

PROJECT MANAGEMENT SETUP

- Creation of master project plan templates, each with associated:
  - Timelines, workflows and milestones
  - Dashboards & Reports
  - Scorecards
  - Project characterization attributes
  - Metrics including Financial | Non-financial KPIs | Process metrics
  - Notification triggers
  - Risk & Issue trackers and other logs/forms (e.g. Lessons learned / Decision record etc)

PROGRAM & PORTFOLIO MANAGEMENT SETUP

- Project, Program, Portfolio hierarchies
- Required roll-ups of any Project level data
- Configuration of standard Management Reports and Dashboards
- Tools for Portfolio Prioritization and Ranking

Process and governance are at the core of the platform

Bubble invests as much thought into supporting organizational processes as we spend managing the technology that underpins our application.

The Bubble team leverages years of consulting experience to provide a solution that supports you in:

- Optimizing your portfolio of projects for greater value
- Streamlining project execution to increase efficiency
- Improving governance and quality assurance to reduce risk and cost

We have built in best practice tools such as risk management, prioritization, workflow management and more, to ensure your organization has the ability to maximize productivity and reduce risk at scale.

SUPPORTED GOVERNANCE FRAMEWORKS

The platform supports Phase-Gate / waterfall and hybrid (waterfall / agile) project delivery frameworks, providing periodic, KPI and other portfolio level metrics regardless of the number type, complexity, or maturity, of its constituent parts.

Bubble Software

1999 25 2024

Users are covered by a consistent monthly fee that's in place until expansion is required

Bubble PPM has a configurable permission structure that lets you decide who gets access to what data and to set permissions for different user types. This can be fine-tuned as needs evolve.

Our **Starter Bundle** offers cost-effective fixed price monthly license fees, for smaller teams looking to control costs as their user base grows. Our **Enterprise Pricing** offers generous volume discounts to organizations onboarding larger teams.

Whatever your mix of user types, Bubble have a mechanism for sharing key project and portfolio information, company wide.

Monthly fees

Dependent on requirements

A **Starter Bundle - Fixed monthly price for smaller teams**

B **Enterprise - Tailored pricing for user groups 100+**

User license fees include: Secure cloud hosting and data storage, regular product upgrades, system security and back-ups, user support desk, Knowledge Base, personal account contact point (for key stakeholders) and access to all standard system modules for all users (if required).

Portfolio outcomes are better with Bubble

Manage all your initiatives in one integrated environment

As a modern SaaS platform, Bubble PPM software is flexible, scalable, quick to deploy and easy to integrate with 3rd party platforms.

We make it easy to start small and expand use of the platform at a pace that suits your users and organization.

> If you have a clear view of key insights and challenges at the macro level, it's much easier to make the right decisions and connect that to priorities throughout the organization
